DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remarks (pages 33 and 34), filed 8/1/2007, with respect to claims 1-14 and 16-132 have been fully considered and are persuasive. The rejection of claims 1-14 and 16-132 has been withdrawn.

Regarding the specification, the Applicant is referred to rule 37 CFR 1.77(b) which states "the specification should include the section in orders..." It is clearly not the Examiner's mere suggestion. Therefore, the specification should be amended to include the ordered sections as suggested.

Allowable Subject Matter

2. Claims 1-14 and 16-132 are allowed.

3. The following is an examiner's statement of reasons for allowance:

- * Rejected claim 1 has been amended to include the allowable subject matters;
- * The objected claims 6, 9, and 18 have been rewritten in independent form to include the limitations of base claims and any intervening claim;
- * The present invention provides a new method to enable an analysis taking into account impact of the one or more environmental factors over at least the period of time (specification, page 3, paragraph [007]).

Particularly, the new method comprises the following features, which the prior art taken either singly or in combination does not teach:

- obtaining third information, wherein... after a treatment of the first external body portion is initiated; and determining a difference... the second information (see independent claim 1);

- obtaining third information... after the first time; and determining a difference... the second information (see independent claim 6);

- obtaining third information... a second time; obtaining fourth information... after the first time; and determining a difference between the third information and the fourth information (see independent claim 9);

- obtaining third information... a second time; obtaining fourth information... is initialed; and determining a difference between the third information and the fourth information (see independent claim 18);

- obtaining third information... is initialed; determining a difference between the third information and the second information; comparing the difference between the first information and the second information with the difference between the third information... the treatment of the first external body portion (see independent claim 59);

- obtaining fourth information... is initialed; determining a difference between the third information and the fourth information; comparing... the treatment of the first external body portion (see independent claim 81).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
